1.0 PURPOSE

Ingersoll Rand has a Management System comprised various pieces of standard work. The EHS Management System includes a process approach for how the EHS function will define and continuously improve standard work for the businesses which allows for the development of standard work processes that meet the needs of internal stakeholders with a focus on involvement and vetting by all appropriate parties.

2.0 SCOPE

This standard applies to all Ingersoll Rand facilities. Where local regulations are more stringent than this requirement, those regulations supersede this requirement.

3.0 REQUIREMENTS

3.1 Ingersoll Rand's Management System includes the following standards:

Number	EHS Standard Work

- 3.2** Standard work is required to be implemented at all sites where the standards apply.
- 3.3** Annually, each site is required to conduct an internal audit on all the standards and score their performance in Gensuite's Immersion Tracker.
- 3.4** Sites are audited on the standards at the frequency identified in the Audit standard work.
- 3.5** New standards are added once approved by the EHS Council and released to the broader EHS Community. Implementation of new standards is expected within 6 months of a new standard release.
- 3.6** This standard is not scored in Gensuite Immersion Tracker.

4.0 Training
